QIANG ZHANG

◇ Irvine, California ◇ (667) 212-6099 ◇ qzhang46@jhu.edu
github.com/vegito2002 www.linkedin.com/in/qiang-zhang-855615117

Education

Johns Hopkins University — **Baltimore, MD**
Master of Science in Engineering (M.S.E.) in Computer Science *GPA: 3.78/4.00* — Sept. 2016 - May 2018

Southeast University — **Nanjing, China**
B.E. in Measuring Control Technology & Instruments *GPA: 3.1/4.0* — Aug. 2007 - Jun. 2011

Experience

Google — Jul. 2018 - Present
Software Engineer — *Irvine, California*

- Backend development.

Nanjing Institute of Measurement And Testing Technology — Sept. 2012 - Sept. 2014
Calibration Engineer — *Nanjing, China*

- Legally binding calibration and certification for over 8000 pieces of academic or industrial instruments.
- Automated workflow for the department resulting in significant productivity gain, and won Anual Best 10 Employee (out of 200+) of year 2013, an unprecedented achievement for a second year.

Project Highlights github.com/vegito2002

Survival Maps — Team: Guoye Zhang, **Qiang Zhang**, Neha Kulkarni, Channing Kimble-Brown, Jeana Yee
Bootstrap JavaSpark TravisCI Maven Heroku iOS sql2o SQLite MVC MapQuest RESTful Git Swift — *2016, Baltimore, MD*

- Fully-fleshed OOSE project where our team, out of real-life concerns for the JHU community, built a navigation app that cares about security no less than efficiency, during a complete multi-iteration life-cycle: requirement analysis, syste design, implementation, testing and deployment.
- Innovative features: crime heatmap, routing security preference, sensitivity to crime threat of different time of a day etc.
- Significant participation in architecture design, back-end server design and implementation. Primarily responsible for backend data retrieving, processing and integration.
- Designed a recursive algorithm to accommodate incompatible traffic data and crime data from different sources.

Multi Diff — Team: Guoye Zhang, **Qiang Zhang**
diff Algorithm HTML MinHash Maven Git ZIMPL Java — *2017, Baltimore, MD*

- Developed a new version of `diff` that intelligently retain bracket pairing while calculating edit distance.
- Enhanced system to track editting ancestry in hierarchially structured multi-file system, producing standard `diff` patch file output as well as intuitive side-by-side HTML visualization.

HMM EM Tagger — Myself
NLP Tagger Supervised-Learning Semi-Supervised-Learning HMM EM Git Java — *2017, Baltimore, MD*

- Compact implementation of a Hidden Markov model based tagger that can do not only supervised learning with viterbi decoding and posterior decoding, but also semi-supervised learning with expectation–maximization algorithm.
- Innovative optimization of word-similarity based tag dictionary pruning that speeds the tagger up by 50%-80% depending on task.

Padding Oracle Attack Demo — Myself
Cryptography Security HMAC SHA Git AES-CBC Go — *2017, Baltimore, MD*

- Down from scratch Golang implementation of a typical padding oracle attack process. Includes both an authenticated encryption component and the adversary component, with almost everything manually implemented down to the integer.

Technical Skills (in order of nonascending proficiency)

Languages	Java, Go, C, Python, HTML/CSS, SQL, OCaml, Swift, Prolog, JavaScript, jQuery
Frameworks & Platforms	JavaSpark, Flask, Bootstrap
Tools	Git, LaTeX, Linux, Bash, Microsoft Office, Intellij IDEA, MySQL

Coursework Highlights (Graduate Level)

Algorithms	Object Oriented Software Engineering (OOSE)	Databases
Computer Networks	Principles of Programming Language	Declarative Methods
Natural Language Processing	Practical Cryptographic Systems	Operating Systems
Machine Learning
